Smart Cities' command centres turn into war rooms

NEW DELHI

Municipalities implementing the Smart Cities Mission have started using their Integrated Command and Control Centres (ICCCs) as "war rooms" for COVID-19 response, including carrying out CCTV surveillance of public spaces, using heat maps to set up virus containment zones and real-time tracking of ambulances.

Senior officials of the Union Housing and Urban Affairs Ministry, which oversees the Smart Cities Mission, have been coordinating the efforts of the cities, an official said. Of the 100 municipalities in the Smart Cities Mission, the ICCCs of 45 cities are "online" or operational, another official said.

The ICCCs set up under the Mission are meant to coordinate traffic management, surveillance, utilities

and grievance redressal. Now, they are being used as a part of the government's response to the coronavirus pandemic, the official said.

Virtual training

"As COVID-19 war rooms, the ICCCs are implementing initiatives such as CCTV surveillance of public places, GIS mapping of COVID positive cases, GPS tracking of healthcare workers, predictive analytics (heat maps) for virus containment across different zones of the city,

virtual training to doctors and healthcare professionals, real-time tracking of ambulances and disinfection services and medical services through videoconferencing, tele-counselling and tele-medicine," a statement from the Ministry said.

For example, Housing and Urban Affairs Ministry secretary Durga Shanker Mishra said in a tweet, Varanasi was using its ICCC as a war room for "24/7 surveillance, tracking and managing important announcements across the city."

The Pune Smart City Development Corporation Limited and the Pune Municipal Corporation had come together to develop an integrated data dashboard to map COVID-19 cases using geo-spatial systems. They then started monitoring the areas around the infected people and setting up buffer zones, it said.

On behalf of Pune Smart City, an integrated dashboard regarding COVID has been developed and under that, daily updating and mapping of information is being carried out, and **Ms. Rubal Agarwal, CEO-Pune Smart City** mentioned that it is of great use in administrative decision-making.
